**REQUEST FOR DETERMINATION OF SEISMIC DESIGN INFORMATION
 FOR CONVENTIONAL CONSTRUCTION REQUIREMENTS**

In an effort to assist individuals in preparing Conventional Construction documents for one and two-family dwellings (R-3 occupancy) or Group U occupancies accessory to one- or two-family dwellings, Building & Development will provide the Seismic Design Category and the Short Period Design Spectral Response Acceleration, S_{DS} , which are necessary to determine conventional construction requirements. Structures are limited to one story in height, with other limitations identified in the California Building Code, the California Residential Code, and the Kern County Code of Building Regulations. Providing this information does not guarantee the building meets Conventional Construction requirements.

The latitude and longitude used to determine the required information is based on the County's GIS system. The accuracy is not guaranteed and it is the sole responsibility of the person preparing the plans to verify the information provided is accurate.

This box to be completed by applicant (all information must be completed and signed by the applicant):

<p><u>Site Information</u></p> <p>_____ - _____ (APN)</p> <p>Project Address: _____ _____ _____</p> <p>Applicant's signature _____</p>	<p><u>Applicant Contact Information</u></p> <p>Name: _____</p> <p>Address: _____ _____</p> <p>Telephone: _____</p> <p>Fax: _____</p> <p>_____ Date _____</p>
---	---

For official use only:

Latitude: _____	Longitude: _____
Mapped spectral response acceleration parameter at 1-second period $S_1 =$ _____	
Seismic Design Category E if $S_1 \geq 0.75$ and cannot be reclassified to D_2 per CRC R301.2.2.1.2.	
Site Class D assumed per CBC Section 1613.2.2	
Short period design spectral response acceleration: $S_{DS} =$ _____	
Risk Category II per Table 1604.5	Completed by: _____
Seismic Design Category: _____	Date: _____
