DESIGNER CERTIFICATION
(Grading)

I hereby certify that the attached plans, engineering calculations, diagrams, and other data submitted were prepared by me or under my supervision, and that the above documents are of sufficient clarity to indicate the location, nature, and extent of the work proposed and show in detail that all work will conform to all relevant laws, ordinances, rules and regulations, including, but not limited to, the following:

Kern County Grading Code	California Building Standards Code
Kern County Code of Building Regulations	Kern County Development Standards
California Water Code - NPDES Permit Activity	Kern County NPDES Permit Requirements

With respect to the stormwater and NPDES requirements per the above referenced Codes, Regulations and Standards, etc., please answer the following questions:

- | | <u>Yes</u> | <u>No</u> |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|
| 1. Will construction activity result in the disturbance of one acre or more of total land area? | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. Is construction activity 'oil & gas' related and will it result in the discharge, to a Water of the State, of stormwater containing contaminants and/or sediments that will contribute to a violation of water quality standards? | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Is construction activity < 1 acre? If "Yes", please provide Site Development Plan in compliance with California Green Building Standards Code (CALGreen) requirements (§4.106 or §5.106, whichever applies) | <input type="checkbox"/> | <input type="checkbox"/> |

I understand that if the answer to questions 1 or 2 is "Yes," then I must complete and attach the "Applicability of NPDES Storm Water Program" form.

I understand that any work within the road right-of-way requires an encroachment permit from the Kern County Public Works Department.

In regards to drainage, all facilities have been designed and sized in accordance with the Kern County Development Standards. Additionally, the drainage basin soil testing to determine infiltration rates and slope stability analysis as required by those standards have been performed and meet the requirement that the drainage basin will completely drain within seven days and that the side slopes, as designed, are stable.

Signature (Engineer or Architect)

Permit Number

Date

CA Registration No.

Project Name

Project Address

Engineer or Architect's Seal

This form must contain both the signature and stamp of the Engineer. By stamping and signing this form, the Engineer certifies all referenced codes, requirements and standards have been complied with, and that this form has not been modified.
