This image contains a map titled "Flood Hazard Information" for Kern County, California. The map shows various flood zones, regulatory floodways, and other flood-related features. The map is part of the National Flood Insurance Program and is used for determining flood risks and providing flood insurance rates. The map is designed to help communities understand their flood risk and make informed decisions regarding flood mitigation and insurance. The map includes symbols and legends indicating different flood zones and features, such as areas of reduced flood risk due to levee construction, areas with increased flood risk due to coastal transects, and areas with regulated floodways. The map also includes information on base flood elevations, drainage basins, and other relevant data. The map is useful for both residents and local authorities in planning and implementing flood protection measures.
