NOTES TO USERS

The information presented on this Flood Insurance Rate Map (FIRM) was published in accordance with the Flores Act of 1973, as amended. The information, once published, is intended to support both the Federal Emergency Management Agency (FEMA) and lending institutions in providing flood insurance and related flood risk information. The FIRM presents data collected through Flood Insurance Studies (FISs), Flood Insurance Rate Maps (FIRMs), and flood hazard data from the Federal Emergency Management Agency (FEMA) and the United States Geological Survey (USGS) as of the date of publication. It does not take into consideration any new data that become available after the date of publication.

For information and questions about this Flood Insurance Rate Map (FIRM), available products associated with this FIRM, including historic versions, the current map date for each FIRM panel, how to order issued Letters of Map Change, a Flood Insurance Study Report, and/or digital versions of this map.

The Flood Insurance Rate Map (FIRM) has been compiled from data primarily obtained from the United States Geological Survey (USGS) and the Federal Emergency Management Agency (FEMA). This map is intended to depict areas of special flood hazard and to depict geometrically bounded regulatory floodplains. The FIRM includes data collected through Flood Insurance Studies (FISs), Flood Insurance Rate Maps (FIRMs), and flood hazard data from the Federal Emergency Management Agency (FEMA) and the United States Geological Survey (USGS) as of the date of publication. It does not take into consideration any new data that become available after the date of publication.
